

Another explanation of the 9/11 tragedy

By Paul Craig Roberts, Zerohedge 12 September 2015

Millions of refugees from Washington's wars are currently over-running Europe. Washington's 14-year and ongoing slaughter of Muslims and destruction of their countries are war crimes for which the US government's official 9/11 conspiracy theory was the catalyst. Factual evidence and science do not support Washington's conspiracy theory. The 9/11 Commission did not conduct an investigation. It was not permitted to investigate. The Commission sat and listened to the government's story and wrote it down. Afterwards, the chairman and co-chairman of the Commission said that the Commission "was set up to fail." For a factual explanation of 9/11, watch this film and a presentation by Pilots For 9/11 Truth:

[And here is an extensive examination of many of the aspects of 9/11.](#)

Phil Restino of the Central Florida chapter of Veterans For Peace wants to know why national antiwar organizations buy into the official 9/11 story when the official story is the basis for the wars that antiwar organizations oppose. Some are beginning to wonder if ineffectual peace groups are really Homeland Security or CIA fronts?

The account below of the government's 9/11 conspiracy theory reads like a parody, but in fact is an accurate summary of the official 9/11 conspiracy theory. [It was posted as a comment in the online UK Telegraph on September 12, 2009, in response to Charlie Sheen's request to President Obama to conduct a real investigation into what happened on September 11, 2001.](#)

* * *

The Official Version of 9/11 goes something like this:

??Directed by a beardy-guy from a cave in Afghanistan, nineteen hard-drinking, coke-snorting, devout Muslims enjoy lap dances before their mission to meet Allah. ??Using nothing more than craft knives, they overpower cabin crew, passengers and pilots on four planes.

??And hangover or not, they manage to give the world's most sophisticated air defence system the slip. ??

Unfazed by leaving their "How to Fly a Passenger Jet" guide in the car at the airport, they master the controls in no-time and score direct hits on two towers, causing THREE to collapse completely. ??

The laws of physics fail, and the world watches in awe as asymmetrical damage and scattered low temperature fires cause steel-framed buildings to collapse symmetrically through their own mass at free-fall speed, for the first time in history.

??Despite their dastardly cunning and superb planning, they give their identity away by using explosion-proof passports, which survive the destruction of steel and concrete and fall to the ground where they are quickly discovered lying on top of the mass of debris.

Meanwhile in Washington

??Hani Hanjour, having previously flunked Cessna flying school, gets carried away with all the success of the day and suddenly finds incredible abilities behind the controls of a jet airliner. ??Instead of flying straight down into the large roof area of the Pentagon, he decides to show off a little. ??Executing an incredible 270 degree downward spiral, he levels off to hit the low facade of the Pentagon. ?Without ruining the nicely mowed lawn and at a speed just too fast to capture on video.

??In the skies above Pennsylvania ??

Desperate to talk to loved ones before their death, some passengers use sheer willpower to connect mobile calls that would not be possible until several years later.

??And following a heroic attempt by some to retake control of Flight 93, the airliner crashes into a Pennsylvania field leaving no trace of engines, fuselage or occupants except for the standard issue Muslim terrorist bandana.

??During these events

??President Bush continues to read “My Pet Goat” to a class of primary school children.?

In New York

??World Trade Center leaseholder Larry Silverstein blesses his own foresight in insuring the buildings against terrorist attack only six weeks previously. ?

In Washington

The Neoconservatives are overjoyed by the arrival of the “New Pearl Harbor,” the necessary catalyst for launching their pre-planned wars.
