

Could energy be free?

Modern society growth is proportional to available energy, so the availability of cost-effective energy for everyone is clearly critical. This post presents a range of issues with regard to the science, views and potential for free energy and so-called renewable energy.

Out of the seven largest markets in the world, namely, energy, agriculture, telecom, auto, chemicals, packaged foods, and pharma, the energy market surpasses all others by a minimum margin of \$3.3 trillion dollars per year. The growing demand for energy drives market size projections to \$10.4 trillion per year by 2020, helping energy maintain its dominant position in the world markets. The 2013 world GDP was USD75.59, so energy comprised about 15%.

Several organisations are working hard to develop low-cost devices that could provide almost-free energy that potentially could destroy or replace most of the current energy industry. Question: how do you think energy industry leaders are reacting? Read banker J P Morgan's reaction to Nicola Tesla's inventions below, and view Thomas Bearden's videos, also below.

However, the most of the official scientific views of 'free energy', Tesla's demonstrations, zero point energy and the like are dismissive. But then, recall everyone 'knew' the sun went around the earth, and peptic ulcers were caused by stress and acidity – until 2 doctors, who had been scoffed at for 20 years – proved these ulcers were caused by bacteria, and won Nobel prizes. Scientific has an alarming history of 'getting it wrong'. As Einstein said, it only takes one person to prove I'm wrong'.

Tom Bearden

Lieutenant Colonel Thomas Bearden, US Army, PhD explains how energy can be extracted from the 'zero points field', the 'dipole' effect and how and why this form of free energy has been buried by various black government, financial and industrial operations as well as the scientific community and non-availability of patents for 'perpetual motion machines'. Recorded around 2002, but similarly valid in 2016. The main difference is that 'money-printing' has extended his forecasted deadline – 47 minutes <https://www.youtube.com/watch?v=Wleifp3Fbe0>

- Thomas article: Clean Electrical Energy from the Active Vacuum 2002 <http://www.cheniere.org/articles/clean%20electrical.htm>
- A 6-minutes video <https://www.youtube.com/watch?v=iKFEEmMotPNo>, and a longer 50 min video that explains the article including many associated factors

https://www.youtube.com/watch?v=hJY8XqFnAyg&ebc=ANyPxKoiO2_L3WFfQZyyXFBfL8GqxZ_cFZPrZTreDPIVY5OmjBo2cSRCdISWUGDYCAqgVu8dBTQJ5uNoF6tJPFEl-PTeWJ4Vow

- History of free energy, suppression, economic cartels in energy preventing free energy, assassination etc. and how it works – over-unity power systems, Lt Colonel Thomas Bearden (<https://www.youtube.com/watch?v=lsJybtR9YIM> 47 minutes) – his website: <http://www.chenierye.org/> – note quotes. This is an old video ~2003 – predicts world will be into mass war in 2007/08 or sooner if new energy generation is prevented – his logic remains, but the various institutions, cartels etc. have managed to delay free energy for another decade since.

Dr. Eugene Mallove RIP

- Description of zero point energy by Dr Hal Puthoff – (watch Dr Mallove 3 videos at the end of first video, linked after the first video)
 - Part 1 <https://www.youtube.com/watch?v=blojNMW-Ias>
 - Part 2 <https://www.youtube.com/watch?v=Luk232UKkls>
 - Part 3 (shortly before he was murdered, a still-unresolved mystery) – https://www.youtube.com/watch?v=36WT_PqFY8U

Perpetual motion machine?

Science skeptic and writer, [Martin Gardner](#) has called claims of such zero-point-energy-based systems, “as hopeless as past efforts to build [perpetual motion machines.](#)” *Perpetual motion machine* refers to technical designs of machines that can operate indefinitely, optionally with additional output of excessive energy, without any cited input source of energy, which is in violation of the [laws of thermodynamics](#). Formally, technical designs that claim to harness zero-point energy would not fall into this category because zero-point energy is claimed as the input source of energy’. The issue is, then, what are the boundaries that comprise the overall system in which the energy resides.

A full explanation of progress in the zero energy science: ‘As to whether zero-point energy may become a source of usable energy, this is considered extremely unlikely by most physicists, and none of the claimed devices are taken seriously by the mainstream science community. Nevertheless, SED interpretation of the Bohr orbit (above) does suggest a way whereby energy might be extracted. Based upon this a patent has been issued and experiments have been underway at the University of Colorado ([U.S. Patent 7,379,286](#)).’ NB mainstream science ‘knew’ the sun goes around the earth, and stomach ulcers were caused by excess acid. <http://www.calphysics.org/zpe.html>

Nikola Tesla

A Device to Harness Free Cosmic Energy Claimed by Nikola Tesla: “This new power for the driving of the world’s machinery will be derived from the energy which operates the universe, the cosmic energy, whose central source for the earth is the sun and which is everywhere present in unlimited quantities.” It is not clear how or whether this related directly to zero-point energy. It is fully documented that banker J P Morgan believed it would work and preclude his profiting from selling energy; he sabotaged Tesla’s progress and stole Tesla’s patents. Acknowledged as the greatest inventor ever, as a result, Tesla died a pauper. <http://www.nuenergy.org/nikola-tesla-radiant-energy-system/>

Dr Steven Greer

Steven Greer, re new/free energy/ET etc. (in particular 15 minutes > 19 mins)
https://www.youtube.com/watch?v=IL7uFTKUK_U

The potential for ‘free energy’ is discussed at https://en.wikipedia.org/wiki/Zero-point_energy – Utilization Controversy section. Zero-point energy, also called *quantum vacuum zero-point energy*, is the lowest possible [energy](#) that a [quantum mechanical physical system](#) may have; it is the energy of its [ground state](#). *Despite the scientific stance to typically discount the claims, numerous articles and books have been published addressing and discussing the potential of tapping zero-point-energy from the quantum vacuum or elsewhere.* See 44 references with links.
