

REAL SCIENCE DOES NOT BACK COVID-19 CLAIMS

From WorldAffairsBrief, 26 July 2020

For the last five months we have been bombarded with a massive and non-stop wave of propaganda about the coronavirus and yet there has been virtually NO PUBLIC DEBATE on the merits of the claims by government, the medical establishment and the media. It has been a totally one-side blitz of exaggeration, misinformation and lies. Any opposition voices are quickly silenced by censorship on social media. Why not debate the claims? -Because none of these mainstream claims can be backed up by reliable science. All of the data presented by government and the media is falsified and/or exaggerated. The only thing that is true in the entire crisis is that there exists a new version of the coronavirus that does cause severe and sometimes deadly respiratory blood clotting in the lungs of those with certain chronic disease. The testing is bogus and full of false positives; the danger to normal people is low; the claim that asymptomatic people are secret carriers of the disease is almost never true; the death rate is highly exaggerated by improperly assigning Covid 19 as the primary cause of death, even to those dying of other diseases; and the claimed remedies like social distancing, shutting down businesses, banning gatherings of groups, and wearing masks are preposterous and meant only to intimidate people into being blind sheep, as well as to create permanent damage to the economy. This week, I will cover the facts on all the major issues so you have the other side of the story.

Governments, heady with power to “defend public health” are resorting to mandatory state-wide mask edicts. Here is the [updated national map](#) on which state and counties are mandating masks. Notice that North and South Dakota are the only states that are free of any mask mandate, including local orders. All other conservative states have a least one county with a mask mandate.

There is resistance in Texas to Governor Abbot’s mandatory order: [Nearly 80 Texas counties have opted out](#) of Gov. Greg Abbott's mask order. Others refuse to enforce it.

In Michigan there is growing [push-back from Sheriffs](#) who are hesitant to enforce coronavirus-related executive orders from Gov. Gretchen Whitmer (D), who has issued over 150 such edicts to curtail the pandemic.

Whitmer recently issued an order demanding businesses deny service to customers without a face mask... Some law enforcement officials are bristling at the notion of enforcing Whitmer’s order, which some view as legally suspect. Ionia County Sheriff Charlie Noll (R) told Mlive, “We’re not the mask police ... and I think we need to be realistic and keep in mind that we are (close to) infringing on people’s rights. I don’t know how much more we really need to be sticking our nose in their business.”

But it is even worse in California where some cities are mandating entire apartment buildings be quarantined, as [reported by Natural News](#):

Residents of an apartment building in Ventura, California, found themselves prisoners in their own homes as they were “locked down” in their own apartment building and subjected to mandatory covid-19 testing and quarantine restrictions.

Commentator [Tom Deweese](#) told of a young couple who got locked down in their home with ankle tracking bracelets.

With their family's best interest in mind, the couple [stupidly] voluntarily got tested for the Coronavirus. Unfortunately, the woman tested positive, even though she showed no symptoms. As a result, the County Health Department asked her to self-quarantine and sign documents agreeing to call the Health Department ANYTIME she left the house. She did not refuse to self-quarantine, but she did refuse to sign those documents.

After refusing to sign the paperwork, the case was turned over to law enforcement. Suddenly, eight law enforcement and health officials were pounding on the couple's door. The health official lied to the judge and said the couple refused to self-quarantine.

With that kind of show of force, you would think they were terrorists. But the consequences of this Covid hysteria are even more severe if you go to a hospital to have a baby. Here is the horror story of one subscriber who can't get her baby back after birthing in a hospital. They are going to test you for Covid and if you test positive, you have lost all your rights.

Thanks for info Joel, much appreciated. I've heard you talk about the smart decision you and your wife made about home births after the ordeal you experienced with the birth of your first child in the hospital... I've been hesitant to share my story, because It's not over yet...

As you know I went into the hospital on June 29th for pre term labor, they stopped the labor, tested me for covid with the rapid quick test (negative) and sent me home the next afternoon.

2:30 am July 11th, I woke up in bed, in excruciating pain, and went straight to the hospital. They came in and told me my placenta was detaching and they wanted to do a C-section right then, they also said they needed to do another Rapid Covid test even though I was negative on the 29th.

40 minutes later they come to take me back to the O.R. and say "by the way, you're covid positive," sooo here I am, in complete shock, going into surgery that I'm already terrified of, super confused how in the hell I'm "covid positive"

They do the surgery, [twins were born]. I never saw them. They would not hold them up so I could look at them not even for a second. They took them away and transferred them to [a children's hospital].

After my surgery I was told that the rapid covid tests are not accurate and throw a lot of false positives. They suggested I take the confirmation test to prove I don't have covid and said as soon as those results were negative, I could see my babies. If I refused the confirmation test, I would not be allowed to see my babies at alllll.....so I take the test.

Holding babies hostage for compliance is an easy tactic for hospitals to take, and it is happening increasingly often if parents refuse to let their baby be vaccinated in the hospital—which you should never do. The only way to be certain of avoiding this is have a home birth with a trained lay midwife.

The next morning, my nurse comes in to tell me the confirmation test was positive as well, so now I have two positive covid tests. So now they have to test my babies for covid, TWICE.....two days in a row....both of my babies are negative. I am not sick, I have no fever, no body aches, I feel great.....NEVER HAD ANY SYMPTOMS

[4 days later] neither I nor their dad still have seen the babies. Even with a negative test their dad is not allowed to see them until he has a second negative test on July 20th and then they'll discuss allowing us to see our babies MAYBE on July 22nd. My babies are PERFECTLY fine. They are so healthy and strong and perfect. They need a little help eating at the moment because they're still a little small, but that's it. [They aren't allowed to breastfeed, and give them critical colostrum which is the best thing for babies.]

[Weeks later] So here we are sitting in our home, feeling perfectly normal and healthy, being told we were not allowed to see our babies. I literally watch my babies from a live stream to my phone with no idea when I'll ever see them. When it comes to this [stuff] we have absolutely NO rights and NO say over ourselves or our children.

You see the trap being set? The rapid test is inaccurate, so they make you take a second inaccurate test as a “confirmation” but neither test is really a better test. None of these quick tests can confirm anything. This kind of testing tyranny can even happen even if you take your children in for a wellness visit where they push their first vaccines on your child—which you should NEVER accept. Here is one woman’s bad experience.

I'm hearing more and more people coming up “positive” who have never even been tested. My second cousin has a new baby. They took her in for the first vaccines. The doctor wanted to test the Infant for COVID-19. The mom said “no”. Two weeks later they came back for vaccines again. The doctor came in and said “your baby is positive for COVID-19”. Then she proceeded to tell him that the test wasn't even done. I'm hearing this more and more with little kids, even adults who waited in line for hours and hours to get the stupid test, never got the test because the line was so long, then got called back saying they were positive.

I am warning all of you, stay away from the establishment medical system. Stay out of the hospitals if you value your liberty. There are plenty of naturopaths and maybe a few OD's who can help without forcing vaccines or tests upon you. Find alternatives now before you feel forced into going to hospital in an emergency.

If you haven't been motivated to get healthy, do it now. I haven't been to a hospital but once in my early life, and I don't intend to go again if I can help it.

Unfortunately, licensed Medical Doctors who are open to alternative therapies are being persecuted. A subscriber writes that her doctor is fleeing California after being investigated and threatened four times by the State Medical board for treating cancer without chemotherapy or radiation. Apparently he found out that California prohibits any other treatment, even if it works.

The doctor is leaving the state, telling his clients, “The medical establishment in California doesn't want me, and I no longer wanted to be part of its system. It seemed best to attempt to

part ways.” But the medical authorities are tyrannical and controlling in other states too, especially about alternatives to establishment protocols.

Another Doctor friend of mine in another more conservative state fears that his license will be on the line if he refuses the coming coronavirus vaccine. Without a license they would take away his freedom to practice. He is ready to quit medicine rather than take the vaccine.

Medical tyranny is getting bad all across the nation. The only US Senator that is contesting the official narrative is **Sen. Rand Paul** of KY, a physician by training. He said individuals "need to assess their own risks with regard to the virus." He added that for "those under 18, the risk of mortality is about one in a million or a little bit less. For those ages 18 to 45, it's about 10 out of 100,000 for the mortality. "Under age 45, this disease we're looking at is less dangerous than the seasonal flu. Above age 45, it's more dangerous than the seasonal flu," he said.

Robert Kennedy Jr., a public advocate of children’s health points out, people are being declared and listed as positive for infection even when NOT tested, as [revealed in Florida recently](#):

A report out of Florida shows many people who have never been tested for COVID-19 are receiving phone calls claiming they’ve tested positive. ABC 7 Sarasota talked with a woman called Mindy Clark who was in line to be tested for the virus when she noticed signs saying only those with symptoms should be tested. Despite leaving immediately after seeing the signs and never receiving a test, Clark was contacted by someone telling her she tested positive.

To label this a deadly pandemic and destroy people’s livelihood is a grave injustice. That is because the test picks up all kinds of corona virus, and even if you did have a few Covid 19 virus particles in your nose or throat, the test doesn’t test for quantity, and chances are very good that with a normal immune system, you would still never get sick.

Last week, I covered the extreme difficulty in trying to do a quick test for this complex virus, that has been bio-engineered from the SARS-1 coronavirus with elements spliced in from HIV, and other bio-engineered viruses. Simply taking a swab sample and cloning all the RNA a billion times doesn’t isolate any unique RNA—and no one is willing to talk about how they possibly sort out the Covid 19 virus from all those billions in the sample and confirm it is Covid 19 and not SARS-1 or the common cold virus—without a full genetic analysis, which would take weeks—not two hours or even 40 minutes.

There is no quick way to reliably confirm Covid 19, and because the WHO and CDC are not requiring any of the testing labs to prove reliability, the market is flooded with tests which pick up generic corona viruses, not exclusively Covid 19, as they claim.

Testing and False Positives:

Everything out there in the media is concentrating on pushing the infectious rate narrative by emphasizing the “sensitivity” of the test: the numbers of false negatives—meaning that you test negative but actually have Covid 19. That is the only aspect they want you to believe is not accurate. A subscriber did some searches of medical journals and found about 300 studies done already about the Covid testing, and a large portion of these studies are published by the

WHO—which is pushing this false pandemic. But in scanning through [this list](#) I came up with an article by Chinese scientists on the “specificity” of the test, meaning how well it limits the false positives (saying you have the disease when you don’t). ***“Potential false-positive rate among the 'asymptomatic infected individuals' in close contacts of COVID-19 patients”*** published by the WHO. That seemed strange since the WHO are a key player in promoting this false pandemic, but it is a large organization and they often publish from other countries like China.

In this paper Chinese doctors reported from a limited data set on the false positive rate and concluded, *“the active nucleic acid (RNA) test screening in the close contacts of the patients has been carrying out in many parts of China[.] However, the false-positive rate of positive results in the screening has not been reported [until] now.”*

I knew that, and was anxious to see their results and why this was being covered up. They continued,

*When the infection rate of the close contacts and the sensitivity and specificity of reported results were taken as the point estimates, the positive predictive value of the active screening was only 19.67%, in contrast, the **false-positive rate of positive results was 80.33%***

Here was a study confirming what I and others had suspected for months. Then I looked down at the listing in the search that followed this article and it said:

“[WITHDRAWN: Potential false-positive rate among the 'asymptomatic infected individuals' in close contacts of COVID-19 patients]” The WHO had officially withdrawn the article claiming “conclusions were depended on theoretical deduction, but not the field epidemiology data...” which was untrue. As I reported earlier, the WHO also demanded one of their European experts withdraw her statement that asymptomatic people don’t spread the virus—showing their bias.

Exaggerated Death Rates:

[Ron Paul had this summary](#) of flagrant examples of deaths improperly being attributed to the disease:

Motorcycle accidents ruled Covid deaths? In the rush to paint Florida as the epicenter of the “second wave” of the coronavirus outbreak, government officials and their allies in the mainstream media have stooped to ridiculous depths to maximize the death count. A television station this weekend looked into two highly unusual Covid deaths among victims in their 20s, and when they asked about co-morbidities they were told one victim had none, because his Covid death came in the form of a fatal motorcycle accident.

Washington state last week revised its Covid death numbers downward when it was revealed that anyone who passed away for any reason whatsoever who also had coronavirus was listed as a “Covid-19 death” even if the cause of death had nothing to do with Covid-19.

In South Carolina, the state health agency admitted that the “spike” in Covid deaths was only the result of delayed reporting of suspected Covid deaths.

*An analysis of reported daily Covid deaths last week compared to actual day-of-death in Houston revealed that the recent “spike” consisted largely of deaths that occurred in April through June. **Why delay reporting until now?***

*We do know that based on this “spike” the Democrat mayor of Houston cancelled the convention of the Texas Republican Party. Mission accomplished? Doesn't it seem suspicious that so many states have experienced “delayed” reporting of deaths until Fauci and his gang of “experts” announced that we are in a **new nightmare scenario?***

Last week in Florida – which is perhaps not coincidentally the location of the Republican Party's national convention – another scandal emerged when hundreds of Covid test centers reported 100 percent positive results. Obviously this would paint a far grimmer picture of the resurgence of the virus. Orlando Health, for example, reported a positivity rate of 98 percent – a shocking level – but a further investigation revealed a true positivity rate of only 9.4 percent. Those “anomalies” were repeated throughout the state.

“Cases” once meant individuals who displayed sufficient symptoms to be treated in medical facilities. But when the scaremongers needed a “second wave” they began reporting any positive test result as a “Covid case.” No wonder we have a “spike.”

The Masks Don't Work

Idiotic Americans who succumb to the mask mandate want everyone to suffer like them. The [Daily Mail reported](#) that,

On an American Airlines flight from Ohio to North Carolina a woman refused to wear a mask. When confronted by a passenger, the woman said she had a medical condition. When the woman was asked to leave, passengers aboard the plane erupted in applause and cheers as she sniped back, 'You can clap all you want.'

Good for her. Don't let them feel self righteous just because the whole world is deceived by this big lie. While the media is still pushing the resurgence of Covid in order to keeping pushing the mask agenda, Salt Lake County leaders (the only Democrat controlled section of conservative Utah) is giving credit to their mask policy for the claimed recent COVID-19 stabilization.

They can't wait to declare victory and establish a permanent pattern of medical mandates. But as Karen De Coster writes, Dr. Fauci doesn't want any testing done on mask effectiveness (lest it show that they are worthless).

Dr. Anthony Fauci said Tuesday he opposes conducting a controlled study on the effectiveness of masks to prevent the spread of the coronavirus. “...I would not want to do a randomized controlled study because that would mean having people not wear masks and see if they do better,” he said.

Of course millions are already going without masks and not getting sick. But why deny a trial, when several have already been done and show that masks don't make any difference? That is the real reason Fauci doesn't want a real test done.

The best [short video summary](#) of the scientific studies showing that masks don't work is by Ben Swann in Truth In Media. Swann is one of the best conservative investigative reporters out there. The video has been removed by YouTube, but some audio is still available and so is his summary with the most important research points.

Denis G. Rancourt, PhD [has the evidence](#) Swann presents in writing: *Masks Don't Work: A Review of Science Relevant to COVID-19 Social Policy*. Here is his opening paragraphs and conclusions. In the link he cites all the relevant research, which you can read.

There have been extensive randomized controlled trial (RCT) studies, and meta-analysis reviews of RCT studies, which all show that masks and respirators do not work to prevent respiratory influenza-like illnesses, or respiratory illnesses believed to be transmitted by droplets and aerosol particles.

Furthermore, the relevant known physics and biology, which I review, are such that masks and respirators should not work. It would be a paradox if masks and respirators worked, given what we know about viral respiratory diseases: The main transmission path is long-residence-time aerosol particles (< 2.5 μm), which are too fine to be blocked, and the minimum-infective dose is smaller than one aerosol particle.

*The present paper about masks illustrates the degree to which governments, the mainstream media, and institutional propagandists can decide to **operate in a science vacuum**, or select only **incomplete science that serves their interests**. Such recklessness is also certainly the case with the current global lockdown of over 1 billion people, an unprecedented experiment in medical and political history.*

Second Pre-planned Pandemic Coming:

Dr. Anthony Fauci said this week it is unlikely Covid-19 will ever be eradicated. He also said years ago that the incoming administration would face a terrible pandemic. He is being accused of knowing in advance about this planned pandemic.

Bill Gates is already making the case for drawing this one out through next year. As the [Daily Mail noted](#),

Bill Gates warns that multiple doses of any coronavirus vaccine may be necessary, schools could be closed until fall 2021 and says 'serious mistakes were made' by the US with the handling of COVID-19 [trying to pin the blame on Trump].

And it appears that the PTB aren't through testing how stupid Americans are. Both the head of the CDC and Bill Gates have talked openly about the next pandemic. Bill Gates even [smiles about how the next one will "get their attention" faster](#). He hypothesis about the idea of biological terrorists picking a pathogen with a high death rate possibly being the second pandemic.

Gary Barnett talks about their plans for [another round here](#) starting with quotes from Robert Redfield, the director of the CDC:

“There’s a possibility that the assault of the virus on our nation next winter will actually be even more difficult than the one we just went through. And when I’ve said this to others, they kind of put their head back, they don’t understand what I mean... We’re going to have the flu epidemic and the coronavirus epidemic at the same time.”

In my opinion, these are not simply prognostications, but are warnings of things already planned and known. Part of the reason for these announcements is to set the stage for the final nail in the coffin of freedom, and to prepare the sheep for mass death purposely created to advance this sinister agenda of total population control. The CDC, and therefore the state, will recommend the flu vaccine followed by the Covid vaccine, and both will infect all recipients with multiple viruses and poisons at a time when the bulk of society is most vulnerable. [This is by design.]

After several months of lockdowns, a carrot was dangled for a brief period, with promises of reopening. That reopening never actually happened in full, as the restrictions remained during the pause, and then the stopgap plan of arranged fake racial strife, rioting, looting, and property destruction was allowed to continue until the next part of this plot could be released on the public. The beginning strategy of this second phase was based on false case increases, enough to instill fear in an already beaten down populace that is once again being told to isolate, mask, distance, and lockdown. The final part of this second phase will come with the first sign of cold weather, and this has already been put into motion due to the near complete decimation of general health due to the government response to this hoax.

What the CDC head is indicating with his comments is that he knows that the flu season coming will be much more devastating than normal, and that all sickness and death will be blamed on a virus that has never been properly scientifically isolated, identified, or verified. That will matter not, as after 8 months of mandated isolation and lockdowns,.. the evil controllers of this fraud that plotted this outcome from the beginning, will use the purposely created weakness of the masses to advance their agendas of control.

Then Gary gets to the long term agenda, that goes forward even after this crisis dooms Trump’s chances for reelection:

*This is the most dangerous time in the history of man. The seriousness of this plot cannot be underestimated. It is not due to any threat of conventional war, and it is not due to any threat of nuclear decimation, it is based on the fact that this is a psychological war waged by psychopaths against all mankind, and it is being advanced by a small group of monsters that have taken control of the minds of the masses through **long-term indoctrination and policies meant to breed dependency**. Fear is the new weapon of mass destruction, not because it is legitimate, but because the people have lost all will to be free, have lost all ability to think, and seek shelter and comfort as a collective herd only capable of existence in a society that is based on totalitarian rule.*

Busting all the Covid Myths:

My analysis has been focused on the false positive testing that is driving all these draconian measures. Here is a [website](#) that uses the establishment data, inflated as it is, to disprove all the myths the media is claiming about the pandemic. It is comprehensive and very well done. They go through every piece of false propaganda we hear and debunk each one. Here are

some excerpts, but I encourage you to read the entire debunking list, which includes details to back them up.

Falsity #1: Children Can Easily Spread COVID to Adults, Including Their Teachers.

This is the rationale for having kids wear masks in school. Response: “children extremely rarely transmit COVID, possibly because their virus load is smaller compared to adults. In fact, some scientists recently shared that they could not find a single case in the world where a child infected a teacher.”

Falsity #2: COVID is Easily Spread By Asymptomatic Carriers. The little science we do have supports the idea that people who do not currently display symptoms of COVID, very rarely transmit COVID. If this is true, it begs the question why we are moving forward with mandating masks and continuing the social distancing game?

Falsity #5: You Can Get Re-Infected With COVID (Just After You Have Had It). Since late May, Korean researchers have confirmed that you cannot get reinfected with COVID, and that these seemingly positive tests people get after being infected and recovering are just false-positives.

Falsity #6: Social Distancing Is Based On Sound Science. Social distancing has never been scientifically proven as a valid tool to slow down or stop the spread of a respiratory virus. Its efficacy is unknown. The idea of social distancing is thought to have originated in a 14 year olds’ science fair project. The distance that has been used in different countries has been “conjured out of nowhere”, certain countries like the US and Canada essentially doubling WHO’s 1 meter rule to “be on the safe side”.

Falsity #11: COVID is Very Deadly For the General Population. “This is nothing more than a flu epidemic if you care to look at the numbers and the data, but people who are in a state of anxiety are blind.” — Yoram Lass, former Director-General of Israel’s Health Ministry. The reality is that COVID has a lethality similar to a harsh flu season — with an Infection Fatality Rate (IFR) of anywhere between 0.1-0.5%.

Falsity #12: COVID is a Death Sentence For The Elderly. “...But it still isn’t clear if COVID is any more deadly than other coronaviruses which are already known to be very dangerous in the elderly, or even more dangerous than the flu. In a recent interview, 2013 Nobel prize winner Michael Levitt said that the age profile of those who died from COVID across Europe is virtually identical to people who normally die from the flu.”

Falsity #15: 2020 Has Been A Very Deadly Year. “The latest data (July 5th 2020) from Europe, analyzed by Ivor Cummins, clearly shows that excess mortality has barely increased compared to the 2017-2018 flu season.”

Falsity #16: We Need More Ventilators. “This might have seemed true at first, but it’s rapidly been increasingly clear that ventilators are the wrong medical intervention against COVID in a lot of cases. Data from late April in New York City confirmed that an extremely high number of patients (97.2% over 65 years of age) who were put on ventilators died. Normally, you would expect around 40 to 50% of patients with severe respiratory distress to die while on ventilators.”

Falsity #17: Lockdowns Have Saved Millions of Lives. “Scientists are getting away scot-free for causing billions of dollars’ worth of damage and this is something that cannot be allowed to happen. It’s not just the World Health Organisation. [Nile] *Ferguson* [Cambridge, who predicted millions would die] wanted Sweden to lockdown, got Britain to lockdown, and when the numbers become normal, exactly what you would expect without lockdown. He then says, ah it’s because of lockdown. This is terrible science. This is science which should go on trial. Scientists cannot cause damage like this and refuse to listen.” — Michael Levitt, 2013 Nobel Prize Chemistry

Falsity #21: The US is Facing a Dangerous 2nd Wave. “He explains how the rise in positive cases corresponds with the rise in testing, and does not equate with a rise in deaths.”

Falsity #22: We’re Very Far From Herd Immunity, And Reopening Too Early Is Deadly.

“Many media reports argued that up to 80% of all people needed to have caught COVID and developed antibodies before the pandemic died down on its own — the so-called Herd Immunity everyone has been talking about. Some scientists now suggest that the real threshold for COVID Herd Immunity is around 10-20%. This is plausible, and would finally explain why lifting COVID lockdowns has essentially not led to a significant increase of COVID cases, deaths or hospitalizations, virtually anywhere in the world.” [There is much more in the link above.]

THE DANGER OF VACCINES

This is new information from what I have published before. Finally, we have a [full debate on the vaccine mandate](#) between Alan Dershowitz and Robert Kennedy jr. They each go out of their way to be cordial but the stakes for liberty couldn’t be higher. I think clearly that Robert Kennedy Jr. comes out way ahead and so do an overwhelming number of viewers in the poll afterwards.

Kennedy points [here](#) how Gates and Fauci are already backtracking on their confidence in the coming vaccine being safe and effective:

Bill Gates and the World Health Organization (see video) say they have confidence in the two leading COVID vaccines: the AstraZeneca (Oxford) vaccine and Moderna’s. Gates is invested in both. Their endorsement of these two lemons should worry anyone hoping that Operation Warp Speed, its billionaire patron and global regulators are capable of yielding a safe or effective shot.

Since February, Gates, Fauci, and WHO have been promising a jab that will induce immunity in 7 billion people, prevent transmission, and impose minimal side effects (see video.) Their current race to lower expectations cannot keep pace with the poor performances of their troubled products. Gates is now hinting that the vaccine may not prevent transmission. Fauci will now settle for 70% immunity.

In Kennedy’s letter to WV legislators, he says the Moderna COVID-19 vaccine is “likely to make more people sick than COVID-19.”

On July 14, 2020 the New England Journal of Medicine published the preliminary report of the results from the phase 1 trials of Moderna’s vaccine for COVID-19. Despite an

extremely high percentage of Moderate to Severe adverse events after the second dose, the group's conclusion was that "no trial-limiting safety concerns were identified. These findings support further development of this vaccine."

Kennedy counters that: "80% of healthy subjects (avg age 33 years old) in the 100 mcg and 250 mcg dose groups had **moderate to severe adverse events after the 2nd vaccination.**" No concerns? Sounds like a coverup to me.

Tom Pappert reviewed the extensive [damage history of the Swine Flu vaccine](#) where he documents that 46 million were vaccinated unnecessarily, and how many died.

In 1976, the Center for Disease Control made the unprecedented decision to vaccinate the United States against swine flu, fearing that it would become a pandemic in the country that would rival the Spanish Flu of 1918-1919. Later, it was established that the mass vaccination attempt was largely unnecessary, and may have proved fatal for some of the 46 million Americans who received it in the massive effort.

After announcing his mass vaccination campaign, CDC director Sencer ordered 200 million doses of the vaccine manufactured, and President Gerald Ford promoted the vaccine by being photographed receiving it at the White House. Less than two weeks after the program began, however, 25 Americans died after receiving the vaccine.

"Scores of others were affected by a mysterious form of progressive paralysis called Guillain-Barre syndrome," the Washington Post noted. "Many became temporarily paralyzed, and several died."

Sencer vehemently denied that those deaths were related to his vaccine, though contemporary experts warned that the swine flu vaccine had not been properly tested and could not be assumed safe.

Watch out for claims of safety in consent forms:

Among other alarming elements of the 1976 initiative is an apparent bait-and-switch pulled when Americans went to mass vaccination facilities, where doctors may not have been present, to receive their vaccines. Americans signed a waiver saying that a swine flu vaccine had been tested, but then received another vaccine that did not undergo the testing. [Which could have been even more dangerous.]

Now you know why Big Pharma wants immunity: See Andrew Wakefield's documentary on how Big Pharma got that immunity: "**1986: The Act**" Natural News has this intro and a [link to the trailer](#): Lastly here is an extensive review of [The Top 10 Reasons to Never Take a Vaccine](#)

1. Toxic Ingredients
2. Toxic Adjuvants – Aluminum
3. Hidden Ingredients – Immunity-Destroying Nagalase
