

A Mass Deception Of Virology & Vaccines: Case Proven?

By John O'Sullivan, PrincipiaScientific.com, 28 April 2021

Last year we [posted an article](#) that triggered both ridicule and debate. It dared to question the accepted narrative of viruses and vaccines; that COVID19 did not exist and terrain theory would topple germ theory when the world awakens from the nonsense of the fake pandemic. Is the passage of time vindicating us?

Today, a clear and undeniable fact persists to annoy the defenders of [Louis Pasteur's theory](#) and undermines all the claims that COVID19 is a deadly virus requiring mass global vaccinations as a remedy.

[Have you ever questioned Germ Theory?](#) Our whole society is based on it. The whole medical profession – especially virology – is based on it. It is why they give us vaccines.

One year on, the Achilles Heel for medical science and virology remains: ***no lab anywhere in the world has provided a gold standard isolate of the SARS-CoV-2 virus – alleged to cause COVID19*** – a supposedly novel respiratory disease but with identical systems to colds and flu.

Our own inhouse expert, [Dr Saeed Qureshi](#), has been at the forefront of exposing that telling omission. It is why we are strong supporters of the [Statement On Virus Isolation \(SOVI\)](#).

Moreover, as our corrupt governments and media keep telling us, cases and deaths from COVID run into the millions but we note a strange corresponding collapse in reported cases and deaths from influenza. How is that possible?

Did the novel virus somehow act as an antidote to other respiratory diseases that have plagued humans for millennia?

Hardly.

So, as this is the anniversary of our publication of the controversial article, it behoves us to take stock.

Herein we post the empirical, proven outcomes. The most telling of which, in terms of discrediting virology as pseudo science, may be in this German video presentation of a

controlled experiment that exposes a cornerstone of virology as not only unreliable, but patently false.

As reported in thefreedomarticles.com:

*“German virologist Dr. Stefan Lanka, who won a landmark case in 2017 which went all the way to the German Supreme Court. Lanka proved in the highest court of the land that measles was not caused by a virus, and that there was in fact no such thing as a measles virus. Lanka is still busy working, and he wrote this article earlier this year (translated into [English here](#)) entitled *“The Misconception called Virus”* in which he explains the history of how mainstream science went horribly wrong with its conclusions (really assumptions) to demonize the humble virus and to falsely ascribe pathogenicity to it when there is none.”*

Watch the video by Dr Stefan Lanka and Dean Braus and judge for yourselves:

If these lab tests are validated elsewhere, then it would seem that Drs Lanka, Andrew Kaufman, Judy Wilyman, Qureshi, et al. are vindicated.

They have shown us that virology incorrectly states – without proof – that viruses originate outside the body, then ‘hijack’ the RNA or DNA of the cell, and then replicate whilst attacking cells indiscriminately.

If this were true, viruses would replicate endlessly, eventually attacking all healthy cells, but they do not. We know that antibodies, a type of white blood cell, regulates the virus.

There exists no video evidence of viruses hijacking cells, except for 3D renders, and animations based on theory

As so-called “conspiracy theorist” the aforementioned mavericks stayed true to the scientific method and insisted upon actual verifiable proofs as to the nature and cause of the most economically devastating pandemic in modern human history. Their persistence and methodological acumen appear to have saved the world from an evil Big Pharma lie that has corrupted medical science for over half a century.

As thefreedomarticles.com neatly puts it:

“When modern scientists are working with diseased tissue, they think the presence of a virus is causing the disease, instead of realizing that the tissue in question has been cut off and isolated from its host, then doused with antibiotics, and that this separation and poison make it diseased and kill it, rather than any virus. Lanka writes:

“All claims about viruses as pathogens are wrong and are based on easily recognizable, understandable and verifiable misinterpretations ... All scientists who think they are working with viruses in laboratories are actually working with typical particles of specific dying tissues or cells which were prepared in a special way. They

believe that those tissues and cells are dying because they were infected by a virus. In reality, the infected cells and tissues were dying because they were starved and poisoned as a consequence of the experiments in the lab."

"... the death of the tissue and cells takes place in the exact same manner when no "infected" genetic material is added at all. The virologists have apparently not noticed this fact. According to ... scientific logic and the rules of scientific conduct, control experiments should have been carried out. In order to confirm the newly discovered method of so-called "virus propagation" ... scientists would have had to perform additional experiments, called negative control experiments, in which they would add sterile substances ... to the cell culture."

"These control experiment have never been carried out by the official "science" to this day. During the measles virus trial, I commissioned an independent laboratory to perform this control experiment and the result was that the tissues and cells die due to the laboratory conditions in the exact same way as when they come into contact with alleged "infected" material."

In other words, the studied cells and tissues die with or without the presence of a virus in exactly the same way; therefore, the virus cannot be the cause of the morbidity and mortality. Interestingly, this exactly what many health experts have stated, namely that there are only two causes of disease: **deficiency and toxicity**.

- Viruses are not living organisms or living microbes
- Viruses do not have a respiratory system, nor a nucleus or digestive system
- Viruses are not alive and viruses are not contagious
- Thus, the fear behind COVID19 is wholly unwarranted

At Principia Scientific International, our words live or die by the scientific method. If claims cannot be verified empirically then they should be taken with a grain of salt. Viruses do not multiply on their own. When added to fertile petri-dishes that sustain cellular life, no additional viral protein structures appear.

Dr Lanka has yet to share all the experiment's details including SOPs, copies of original run sheets, batch records, solutions, concentrations, incubation times, etc. of the CPE experiment. For that reason, we pose the title of this article as a question. It awaits wider confirmation.

Likewise, we urge the medical community to hold true to Koch's Postulates: if there is no isolation of a virus, there is no purification. Without purification you have only speculation – and ***that is not solid science!***

About John O'Sullivan *John is CEO and co-founder (with [Dr Tim Ball](#)) of Principia Scientific International (PSI). [John](#) is a seasoned science writer and legal analyst who assisted Dr Ball in [defeating](#) world leading climate expert, Michael 'hockey stick' Mann in the '[science trial of the century](#)'. O'Sullivan is credited as the visionary who formed the original 'Slayers' group of scientists*

in 2010 who then collaborated in creating the world's first full-volume debunk of the greenhouse gas theory plus their new follow-up book.
