Editor's note: Please click on above link to see the two videos included in this post. The following letter was sent by email to all key New Zealand politicians, media and several involved parties.

Dear politicians, law enforcement agencies and members of the media,

In my advice of 17 July 2021 I attached a 2018 letter from the Minister for Climate Change which reads like a draft *mens rea* defence against my then supposed allegations of fraud.

My letter of 15 May 2019 laid out each substantial criticism of PM Ardern and Minister Shaw's lack of candour.

My letter of 2 August 2020 substantiated my claim against them for knowingly promoting the alleged fraud. The history was explained. The facts regarding the true causation of climate change were reinforced. Information was included from the Russian Academy of Sciences which showed the generally accepted science behind climate change, the linkage with the solar sciences and the credible forecast for imminent solar initiated cooling.

The official report of the Russian Institute of Economic Analysis was included which shows that Anthropogenic Global Warming Theory is bankrupt in every respect. After 30 years it is still rejected by the world's largest emitters of (human) carbon dioxide in sovereign countries where more than 80% of the world's population resides.

Those countries, **supported by both empirical science and economic necessity, will likely never join the fraud**, making this government's actions a total waste of taxpayer time and money.

Evidence was furnished showing how the major carbon emitters are deliberately setting out to increase their carbon dioxide emissions as a testament to that fact. The government's alleged climate fraud will therefore impoverish every New Zealander without any justification other than meeting the objectives of the alleged fraudsters.

To reject the "global warming" fraud absolutely, evidence was provided that varying cycles of solar activity cause the change in Total Solar Insolation (which comprises 99.9% of Earth's energy budget) and the impact of ongoing solar variations are moderated by the effects of water, water vapour, clouds and precipitation. Evidence showed that the power of the water cycle and sun dominate climate change, against which **human activity is almost totally insignificant**.

Carbon dioxide, methane and nitrous oxide have no identifiable impact on climate change. Every private or government carbon trading scheme is consequently a fraudulent enterprise.

I have provided PM Ardern and Minister Shaw every opportunity (on more than 50 occasions) over three years to explain their promotion of what I believe has become the biggest fraud in New Zealand history as a part of what may already be the biggest fraud in human history.

I am exercising my right as a citizen of good standing to complain about malfeasance at the highest level of our Government.

I have made every effort to have the NZ Serious Fraud Office, NZ Police and the NZ Ministry of Justice move against this fraud and investigate the actions of those directly complicit. They have turned their backs on my amply justified allegations. I now need to ask: are they being influenced by those to whom they are accountable?

We surely cannot continue with a government that is so poorly advised, and fundamentally ignorant that they have established their own fake climate emergency despite the absence of credible threats.

They knowingly set in place *ultra-vires* legislation to support their deception. **The assurance that human action can influence or change Earth's climate is just a lie.**

In the event that anyone cannot understand some of my earlier written information of 17 July 2021, here are two short YouTube videos which contain some self-evident facts.

and

Vaclav Klaus (a former President of the Czech Republic) has accurately commented:

“The largest threat to freedom, democracy, the market economy, and prosperity at the beginning of the 21st century is no longer socialism or Communism. It is, instead, the ambitious, arrogant, unscrupulous ideology of environmentalism. So writes Vaclav Klaus, [former] president of the Czech Republic, in *Blue Planet in Green Shackles: What Is Endangered – Climate Or Freedom?* In this brilliantly argued book, Klaus argues that the environmental movement has transformed itself into an ideology that seeks to restrict human activities at any cost, and that policies being proposed to address global warming are both economically harmful — especially to poor nations — and utterly unjustified by current science.”

If you are a politician reading this, I hope you will act to restrain the illegitimate conduct of both the named parties and their numerous co-conspirators, having due regard for your duty

of care as a sworn member of Parliament, to take action to repeal the various limbs of the fraudulent and therefore ultra vires **Zero Carbon legislation.**

Given the quantity of information provided, the financial implications of the alleged and proposed fraudulent acts and the importance of this matter, your ignorance, whether real or feigned is not an excuse.

Yours sincerely

John Rofe

NZ Citizen and taxpayer

Retired Fraud Investigator

PS. Access to the world authorities whose evidence will be required to bring the Prime Minister and Minister for Climate Change to justice is readily available from the New Zealand Climate Science Coalition and the Environomics (NZ) Trust. I am grateful for their support and advice during the course of my investigations.

Please share so others can discover *The BFD.*
