

## Moderna-NIH mRNA vaccine deal confirmed pre-pandemic ... again

By the Editor, cairnsnews, 16 December 2021

Anthony Fauci under intense pressure from Kentucky senator Rand Paul over gain-of-function research funding in China. Note the fingers fiddling with a rubber band.

US radio host [Glenn Beck](#) has confirmed the partnership between biotech company Moderna and the US National Institutes of Allergies and Infectious Disease (NIAID) before the so-called pandemic broke out.

Beck appeared on Tucker Carlson's show last week to discuss a 500-page document from Moderna that on pages 104-5 referred to the private agreement involving "mRNA coronavirus vaccine candidates developed and jointly owned by NIAID and Moderna".

The NIAID director and chief medical adviser to presidents is Anthony Fauci, who has repeatedly lied to the US Congress and media, that the SARS-Cov-2 virus was an accidental mutation with a bat virus and that it was not the result gain-of-function research. The myth is perpetrated to this day by the dumbstream media.

As revealed by The Gateway Pundit in February, 2021, the private and confidential agreement between the NIH (National Institutes of Health) and Moderna was signed on December 12, 2019, weeks before Covid-19 was even known to the public or acknowledged by the US, China, or the World Health Organization. NIH, of which NIAID is an offshoot, sets a fiscal policy for grant awards every year.

“Today Dr Lawrence Sellin (PhD), who contributed much to this effort to uncover the truth about COVID, reported that a December 12, 2019 agreement was signed by Dr Ralph Baric that he would receive the ‘mRNA coronavirus vaccine candidates’ developed and jointly-owned by NIAID and Moderna,” the independent news outlet reported.

Sellin, a retired army reserve colonel and businessman, says a complete sample of Covid 19 was produced by early 2019 by the Peoples’ Liberation Army (PLA) and the Wuhan Institute of Virology with financial help from Dr Fauci’s NIAID. It was tested on selected participants in the Military World Games from October 18–27, 2019. A US military team participated in the Games.

The story of the NIH-Moderna collaboration was almost universally ignored until Glen Beck resurrected it on Tucker Carlson, citing documents he said had been smuggled out of China and research by Judicial Watch and others.

Gateway Pundit has continued to [expose the ongoing cover-up](#) of the NIAID-Fauci-Wuhan deception. Fauci, when questioned in the Congress by Senator Rand Paul, continued to brazenly lie that there was no funding for such research and that it was not gain-of-function research. Fauci, of course, sees himself as “science embodied” and above prosecution.

Beck said the gain-of-function virus research, which Fauci said never happened, did happen in November of 2015 under Dr Ralph Baric who published a paper on it. The funding came through NIAID to the EcoHealth Alliance (headed by the eco-fascist Peter Daszak) working at the CCP- controlled Wuhan Institute of Virology.

“What you may not know is that in November, the same month that (Dr Baric’s) published paper comes out, the United States begins a partnership with Moderna and they are searching for an mRNA corona virus vaccine – kind of a weird coincidence, but wait, it gets worse,” said Beck.

“In this time we skip to 2018 (and) DARPA (US military research agency) receives a proposal from Dr Baric ... Dr Shi (**Zhengli**) from Wuhan and Peter Daszak from EcoHealth, and DARPA sees this and says this is far too dangerous, we’re rejecting your proposal.

“We don’t know what happened from there, but we do know just about 12 months later in Wuhan – where Peter Daszak, Dr Shi the bat lady, and Dr Baric were all doing research on corona viruses – about a year later, there’s an outbreak, and the outbreak actually begins according to documents that we have that have been smuggled out of China, that there were ten hospitals involved by October with patients that we now know, are corona-like virus symptoms. They didn’t know what was going on. Now, that was in October.

“Remember, we didn’t know anything about this in December. We were starting to get rumblings. China said there was some sort of an outbreak on December 31st, but Dr Baric signs a government deal with Moderna.”

Beck said the deal of some 158 pages was made and on page 104 they enter a “specific private, confidential agreement”. “The NIH appears to be transferring technology to Dr Baric, but what they’re making clear is quote, ‘mRNA coronavirus vaccine candidates developed and jointly owned by NIAID and Moderna’,” he said.

“Now, this is weird because it’s two weeks later that we know there’s a problem. They sign that deal two weeks before, and they sign it with the doctor who happened to be a partner with the bat lady in Wuhan.

“Here’s where it gets really dark. These are the same group of people that, in the end of January, begin to have meetings, and they shut down and begin to smear anyone who’s looking into the lab leak theory. They establish ‘that’s not true, don’t even look there’.

“It appears to be collusion. You know we’ve passed this on to several people in Congress and the Senate. We know Rand Paul is on this, and Dr Fauci has some answers to give.”

Dr Francis Collins, former director of the NIH, has admitted in a media interview the NIH “has a stake” in intellectual property used in the COVID vaccine.
