Should We Arrest the Government Down Under?

Australia has notified its citizens today that they can comment, before Friday, December 15, on "the response to Covid." Three-page maximum. Here is my reply, verbatim:

To Australian Government, Prime Minister and Cabinet. From Mary Maxwell, PhD, LLB, 175 Loudon Rd, Apt 6, Concord NH 03301 USA December 12, 2023.

I submit this for public use. It is a reply to Commonwealth Government Covid-19 Response Inquiry, especially terms of reference "governance." I am a graduate of Adelaide Law School, and a dual citizen of US and Australia. My expertise in the matter at hand can be seen in my 2013 book Consider the Lilies and such parts of my 2011 book Prosecution for Treason that deal in disease as a bioweapon, and which describe how traitors can and do avoid the law.

In 2020, as soon as President Trump ordered Operation WarpSpeed to attain a vaccine for Covid, I was in US district court, and later in First Circuit Court of Appeals to seek a restraining order against the mandating of any vax. My appeal brief, in Maxwell v US Department of Defense, quoted from Questions asked in Australian Parliament, published in Hansard 1 June 2021 and 5 February 2021. My purpose was to show irresponsibility of various governments and the absurdity of the pandemic. (The bolding here was added by me.):

In Parliament, Tony Zappia, MP, asked John Skerritt, Deputy Secretary Health Products Regulation. "Once you get vaccinated, will you have to be vaccinated in, say, 12 months' time?" Dr Skerritt replied: "If you know the answer to that, could you tell us! That's the \$64 billion question. And that, of course, is one of the primary questions that people following this epidemic are asking. We hope not. There are two possibilities: either the current vaccines don't provide long-term protection per se, or there is antigenic or virus strain drift."

Senator Malcolm Roberts asked (thinking of ivermectin?): "The vaccine only has provisional approval. Is it true that provisional approval is only possible where there are no approved pharmaceutical treatments available?" Mr Edwards replied: "The provisional approval is possible where there is not a similar treatment available in that, for that group of patients."

Fiona Martin, PhD, MP, asked about inconsistency between states as to vaccinating children up to age four years. Dr Murphy replied: "We are spending well over \$23 million, I think, on a comms campaign, which is in three phases. The first phase is to get people confident about the registration process. They feature gentlemen in white coats and other people to assure people that our registration processes are as rigorous as anywhere in the world...."

Tony Zappia, MP, asked "Have there been any concerns raised, in respect to pregnancy and the vaccine?" Dr Skerritt replied: "Again, it's more a lack of data rather than any evidence of

miscarriages and the like. ... Some clinical groups are recommending that, if you're not in a high-risk or high-exposure group and if you're pregnant, you hold off until you have the kid. However, there are the examples of the US and the UK, where you've got a number of pregnant healthcare workers and both systems are under such strain. If you took every pregnant doctor and nurse out of the UK at the moment and told them to stay at home for nine months, you'd put the system even under more stress. ... There hasn't been any evidence—and I'll check with Dr Cook that my statement is correct—of ill effects in pregnancy. It was more that, in clinical trials, it's normal to exclude pregnant people."

Mike Freeland, MD, MP asked about providing vaccine to our Pacific neighbors. Dr Murphy replied: "Department of Foreign Affairs and Trade have invested over half a billion dollars in a vaccine for the Pacific." Dr Skerritt said "The Indonesians have never seen a messenger RNA vaccine before, and they want high-level technical, scientific help with those vaccines.... [We are also] funding procurement that will cover the full population of East Timor, Papua New Guinea and all the Pacific islands, and will cover a percentage of the population—and a lower percentage targeted at vulnerable groups—in countries like Indonesia, Vietnam, Laos, Cambodia, Myanmar, we hope, and the Philippines." [Poor things.] -- end of Hansard quotes

Malice Aforethought

How is it possible, after so many facts have come to light, that the Australian government still doesn't acknowledge that the Covid illness was planned? It was a bioweapon (similar to many previous ones, such as AIDS and polio). US Senator Rand Paul has shown that certain American persons interacted with Chinese persons in Wuhan to make Covid-19 "jump."

I now quote Robert F Kennedy, Jr's 2023 book, Wuhan Cover-Up, Chapter 38 "Spooks in the Kitchen." (Bolding added by me.):

"The CIA's cutout USAID invested \$64 million in bioweapons research at the Wuhan Institute of Virology [WIV] and, with NIAID, funneled all their grants to WIV through EcoHealth Alliance which the evidence suggests was functioning as a CIA front after December 2015. Sir Jeremy Farrar who masterminded the coverup with Drs Fauci, [Francis] Collins, and [Peter] Daszak, is the Director of Wellcome Trust, an organization with deep ties to MI5....

"In May 2021, President Biden asked US intelligence agencies [oh, please] to conduct an investigation of Covid's origins.... In August...they told the White House they were unable to determine whether the Covid bug originated in the Wuhan lab. Then ... a current CIA officer told Congress that CIA officers had bribed officials on that team ... with 'significant monetary incentive' to change their position from that [the virus] originated in the Wuhan lab to 'unable to determine.' ..." Congress then "detailed those charges in a letter to FBI Director William Burns." No LE action by Attorney General Merrick Garland, has followed.

Fraud vitiates everything it touches. Everything about Covid is fraudulent. Just the fact that no one got arrested after the above whistleblower's revelations is enough to tell you the US government is hopelessly corrupt. UK, too. From Kennedy's book again, page 360, "Neil Ferguson made a professional career using crooked modeling to sow panic in a series of concocted pandemics. As Johnny Vedmore observes '... No one has made as many false predictions on potential pandemic numbers.' "In 2001, Ferguson's wildly exaggerated

projections about ... foot-and-mouth disease sparked the British government's culling of eleven million sheep and cattle." (Bet they knew.... Bet it was economic sabotage.)

Shame, shame on Australia for always licking the boots of US and UK. And shame on America for throwing away its birthright. I can show you that the autism epidemic and also the tragedy of Thalidomide were deliberately caused. And now you are asking citizens to weigh in on the Covid Response. Here is my best advice: Round up all Australians, here or abroad, who played any part in the production or dispensing of Covid and the vaccine. Who approved of the false PCR testing? Who mandated masking and social distancing? Who made a fortune, with taxpayers' money on the testing and ventilating? Was there genocidal intent?

If so, you can get them for the crime of genocide. You can also get them for war crimes, although that has to be in a context of war. Is killing thousands of citizens and injuring millions a war situation? Probably, but we need not go that far. Ordinary crimes of homicide and assault will do. Grievous bodily harm. Terrorism. Funding terrorists (I mean paying our terrorists in office). Perjury. Theft of public funds. What about the 'theft' that occurred when people were dismissed from their job and lost their income based on refusal to be assaulted by the vaccine?

What about the fact that the whole pandemic fakery was intended to lead to a police state with loss of freedom of speech, surrender of property rights, and humiliation of everyone? What about the unjustified lockdowns and loss of small businesses? What about Australia's worldwide loss of reputation? Can it be regained? It sure can. Let Oz be the leader in the jailing of ministers, bureaucrats, medical traitors, and judges. Remove Australia's signature right now from the UN Charter and all its pomps and all its works. Throw the globalists out. Or reinvent Port Arthur jail to hold them.

Honor to the first man who will take charge! Admiration to new heroes! If you're going to die for your country, don't do it by taking a stupid vax. Do it by truth and guts and energy.

-- "And the stockmen tell the story of his ride...." He did it. You can do it! Come on, it's late. Hurry!
