

We are living in the most dangerous period in all human history

The LaRouche Organization, 2 September 2024

We are living in the most dangerous period in all human history and there aren't enough people who realize that that's the case.

The founder of the Schiller Institute, Helga Zepp-LaRouche, in her comments to the [International Peace Coalition](#) meeting on Friday, focused on the “extremely disturbing” development of the modification to the U.S. nuclear doctrine which President Biden signed onto. This insane change in policy was covered in an [article](#) written by nuclear weapons expert, Ted Postol. He states that a "relatively new super fuse or 'super fuze'...is already being fitted onto all U.S. strategic ballistic missiles.”

The significance is that this is

...more than just a ‘slight modernization’ of weapons components, but a dramatic step towards the capability to fight and win nuclear wars with both China and Russia.....In the face of all of this, Chinese and Russian leaders will have no choice but to implement countermeasures that further increase the already dangerously high readiness of their nuclear forces.

Later in the article he states that it leaves Russia and China no other possibility than to develop ways of deterring the U.S., giving the example that

Russian President Vladimir Putin himself approved the development and revealed the existence of the ultimate doomsday weapon-the Poseidon robot submarine, which can carry a 100Mt warhead into the harbors of U.S., European, and east Asian cities-capable of destroying urban areas to ranges beyond 50 miles (80 km) from its underwater detonation point.

In conjunction with the increased danger of a modified U.S. nuclear doctrine, there is the danger that, because Ukraine is losing on the Donbass front, and they will most likely ultimately lose in the Kursk region, that they will become desperate enough to use long-range missiles deep into Russian territory, which some in the West have already given the go ahead to do.

The situation in the Middle East continues to be a hotspot with the potential to broaden into a war with Iran and beyond. And the unspeakable horror for the people of Gaza continues with 20 % of the population, approximately 400,000 people, suffering an acute condition of starvation. Also, it has been revealed that Israeli Prime Minister, Benjamin Netanyahu, and several Israeli cabinet ministers, knew ahead of October 7th that an attack was coming according to Israeli opposition leader Yair Lapid.

Helga Zepp-LaRouche urged people to read Ted Postol’s article and get out into the streets to protest. She stated in her weekly webcast that she doesn’t see a change occurring in the institutions of the United States and the West, so the only way to change the situation is by people protesting in the streets as well as continuing the creation of a [Council of Reason](#). There

will be a rally on September 28th in D.C. held by the [Rage Against the War Machine](#) which you can attend, as well as one held by former UN weapons inspector, [Scott Ritter](#), on the same day.

Weekly Dialogue With Helga Zepp-LaRouche

This is a time like no other—a time in which “Global NATO” has actually invaded Russia.

It is now clear, including from articles published in the New York Times and other outlets, that the invasion of Russia was planned at least a year ago, and that its planning and execution, from the beginning, involved the participation of NATO forces, including operatives from Poland, Ukraine, the United States, Germany and other nations. A Russian commander, Major General [Apti Alaudinov](#), commander of the Chechen Akhmat special forces and deputy chief of the Russian Armed Forces’ Main Military-Political Department, in an August 19 interview, has also made this clear.

Alaudinov stated that the invasion of Kursk “was prepared directly under the American leadership.”

Alaudinov also delivered a message to the people of the United States and Europe: “You probably do not see or hear that your leadership is doing all it can to launch a nuclear war, and the blame for the current situation in the world lies solely on America and the NATO bloc ... as you’ve been trying with all means to make Russia cross the red line and start protecting itself using all these nuclear weapons. I don’t think this is something you really want. If you don’t want this to happen, speak out! Go to the streets and stop your government!”

He concluded: “In any case, if you want Russia to lose the war, you have to understand: The Russian nuclear state will not lose the war. After all, why do we need the world if there is no Russia? That’s why I’m saying: You either wake up and go to the streets to stop your government, or you all (will) appear ... in the Third World War zone. This is the issue of the nearest future!”
